ABOUT ME

Full-Stack & Mobile App Developer with 1.8+ years of hands-on experience engineering scalable web and cross-platform mobile applications. Skilled in React Native (Expo), Node.js, Next.js, and modern database ecosystems (MongoDB, PostgreSQL, Redis) with a strong emphasis on clean architecture and performance optimization. Experienced in collaborating with cross-functional teams, communicating with international clients, and delivering production-ready software solutions.

SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, SQL

Frontend & Mobile: React, Next.js, React Native (Expo), Tailwind CSS, NativeWind, Redux Toolkit, ShadcnUI

Backend & Database: Node.js, Express.js, MongoDB, PostgreSQL, Redis, Mongoose, Oracle, Prisma

DevOps & Tools: Docker, Git, GitHub, Firebase, RevenueCat, Vite, Figma

EXPERIENCE

Join Venture AI

Frontend Developer

Mohakhali, Dhaka

May 2025 – October 2025

- Integrated AI-related API endpoints and collaborated closely with backend developers for seamless integrations.
- Met with foreign clients to gather detailed product information and functional requirements.
- Built and maintained AI web applications and modern AI web tools.
- Successfully delivered 7+ client projects, optimizing performance and resolving technical bugs.
- Maintained strict W3C standards and addressed cross-browser compatibility issues.

Join Venture AI

Cross-Platform App Developer

Mohakhali, Dhaka

November 2025 – Present

- Developed and maintained cross-platform mobile applications using React Native (Expo).
- Integrated third-party services and SDKs including Firebase, RevenueCat, authentication, analytics, and payments.
- Managed full app deployment workflows for Google Play Store and Apple App Store (builds, testing, submission, releases).
- Built reusable and scalable mobile UI components while keeping a clean and modular code architecture.
- Worked with Expo/EAS Build, environment configurations, OTA updates, and platform-specific debugging for Android and iOS.

PERSONAL PROJECTS

Floruit (Co-Parenting Mobile App)

- Developed and maintained a production-ready cross-platform co-parenting mobile application for Android and iOS.
- Integrated authentication, subscription systems, push notifications, real-time messaging, and third-party services.
- Managed Play Store and App Store deployment workflows, including builds, testing, updates, and release management.
- Built scalable mobile UI components and handled complex state management using Redux Toolkit.
- Collaborated with backend developers for API integration, chat systems, and real-time application features.
- Worked with Expo/EAS Build, environment configurations, OTA updates, and platform-specific debugging.

Technology: React Native (Expo), TypeScript, Redux Toolkit, Firebase, RevenueCat, REST API

Ezmart (E-commerce Full-Stack Website)

- Developed a full-stack e-commerce platform using Next.js, Express.js, MongoDB, and Mongoose.
- Built RESTful APIs for authentication, product management, order processing, and admin operations.
- Implemented Redux Toolkit for scalable state management across products, cart, wishlist, and user authentication.
- Designed MongoDB schemas and managed database operations using Mongoose.
- Optimized SEO and application performance using Next.js server-side rendering and modern frontend practices.

Technology: Next.js, Shadcn-UI, Express, MongoDB, Mongoose
