About Me

Frontend-focused Jr. Full-Stack Developer with 1+ year of hands-on experience building scalable web and cross-platform mobile applications. Skilled in React, Next.js, and React Native (Expo), with focus on performance optimization and clean architecture. Experienced in collaborating with cross-functional teams, communicating with international clients, and delivering high-quality, user-centric solutions.

Skills

Front End TypeScript, React, Next.js, Tailwind CSS, Redux, Redux Toolkit, Shadcn/UI, NativeWind
Back End Node.js, Express.js, MongoDB, PostgreSQL, Mongoose, Prisma
Apps React Native (Expo), Firebase, RevenueCat
Other Vite, Git, GitHub, Figma

Experience

Join Venture AI Frontend Developer

Mohakhali, Dhaka
June 2025 - present

- Integrating an AI-related API Endpoint, collaborated with backend developers for seamless API integrations.
- Meeting with Foreign Clients, gathering information, and requirements.
- Building and maintaining AI web applications, like AI Web tools.
- Completed 5+ Client projects and fixed performance optimization and bugs.
- maintained W3C standards and addressed browser compatibility issues.

Cross-Platform App Developer

December 2025 - Present

- Developed and maintained cross-platform mobile applications using React Native (Expo).
- Integrated third-party services and SDKs including Firebase, RevenueCat, authentication systems, analytics, and payment-related services.
- Managed complete app deployment workflows for both Google Play Store and Apple App Store, including builds, testing, submission, and release updates.
- Built reusable and scalable mobile UI components while maintaining clean and modular code architecture.
- Worked with Expo/EAS Build, environment configurations, OTA updates, and platform-specific debugging for Android and iOS.

Personal Projects

Floruit (Co-Parenting Mobile App)

- Developed and maintained a production-ready cross-platform co-parenting mobile application for Android and iOS.
- Integrated authentication, subscription systems, push notifications, real-time messaging, and third-party services.
- Managed Play Store and App Store deployment workflows, including builds, testing, updates, and release management.
- Built scalable mobile UI components and handled complex state management using Redux Toolkit.
- Following the neo-brutalism design trend and creating a retro design
- Collaborated with backend developers for API integration, chat systems, and real-time application features.
- Worked with Expo/EAS Build, environment configurations, OTA updates, and platform-specific debugging.

Technology: React Native (Expo), TypeScript, Redux Toolkit, Firebase, RevenueCat, REST API
